ABOUT

Hello! I'm a Unity game developer. Game development is more than just a job for me—it's my biggest hobby and passion. That's why I continuously learn new things, improve my skills, and strive to design flexible, parametric systems. My goal is to become part of a team that creates games players truly enjoy.

EXPERIENCE

Game Developer, ChronoKrit

Jan 2026 – Present

- Architected scalable, modular game foundations by leveraging **Zenject** and **Reflex** dependency injection frameworks.
- Cut GC allocations and frame spikes by converting coroutine-based flows to **UniTask**, reducing **memory/GC alloc** by **30%**.
- Implemented dynamic **UI/animations** via **DOTween** and **LitMotion** for high-fidelity game feel.
- Led **full-cycle development** of Samurai Bloodbound (2D Action Platformer), leveraging **OOP** and **design patterns (Strategy, Observer, Flyweight)** to build scalable core **combat**, **AI**, and **FMOD** audio.
- Diagnosed and eliminated performance bottlenecks using **Profiler**, **Frame Debugger**, and **Project Auditor**; reduced draw calls from **55** to **15** via **Sprite Atlas optimization**.
- Designed custom Unity editor tools** that automated repetitive designer tasks and accelerated team workflow speed.
- Integrated live-ops and backend infrastructure — **Firebase**, **AdMob**, **IAP**, plus **PHP/MySQL REST** services for esports management.
- Authored complex **AI state machines**, custom **A* Pathfinding**, and a dynamic **3D Grid Building System** for a mafia simulation.

Game Developer, Bionluk (Freelancer)

Feb 2024 – Oct 2024

- Optimized runtime performance by implementing reusable **Object Pooling** systems for complex spawning.
- Integrated **Unity NavMesh** to deliver smart, responsive AI agent navigation and movement.
- Designed **optimized UI systems** with a focus on **performance** and **scalability**.

SKILLS

- Zenject, Reflex, Unitask, DOTS, Netcode for Gameobjects
- DOTween, LitMotion, PrimeTween, FMOD
- Cinemachine, Timeline, Unity Shader Graph (Basic), Profiler
- Custom Editor Tools, Odin Inspector, Git, Localization, Addressables

LANGUAGE

English (B1) • Turkish (Native)

INTERESTS

Game Design Analysis • Playing Video Games •
Reading Books & Comics • Playing Guitar

MY PROJECTS

- 4 editor tools published on [\[GitHub\]](#).
- Created 10+ open-source Unity projects
- Published 3 mobile games on **Google Play**
- Published 3 games on **Yandex Games**
- Released multiple playable prototypes on **itch.io**
- [\[Itch.io\]](#)

EDUCATION

Computer Programming

SAKARYA UNIVERSITY OF APPLIED SCIENCES 2023-2025
